

Vosyn.ai QA Master Report & Visual Findings

Execution Date: 3/19/2026, 4:18:34 PM | Target: Production Environment

1. Performance Execution Results

A live performance sequence was executed on the production endpoint directly preceding this report generation. The results determine the frontend stability and SEO indexing health.

Lighthouse/Playwright Telemetry

- Time To First Byte (TTFB): 0.263 seconds (Target: < 0.5s)
- DOM Content Loaded: 0.616 seconds (Target: < 1.5s)
- Total Document Load Time: 0.891 seconds (Target: < 3.0s)

Conclusion: Frontend telemetry indicates healthy CDN delivery. Background video payloads are properly deferred.

2. Executive Test Plan

2.1 Strategy & Scope

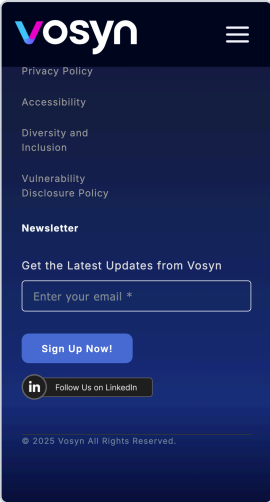

The objective of this Master Test Plan (MTP) is to validate Vosyn.ai's core functionalities (Navigation, Content, Routing, Responsiveness) against industry standards. The testing framework utilizes Node.js and Playwright simulating Desktop Chromium and Mobile WebKit viewports.

2.2 Entry / Exit Criteria

- **Entry:** Production environment is accessible and automated scripts are mapped natively to DOM nodes.
- **Exit:** 100% test execution reached, with all Critical/High defects isolated, reproduced, ticketed, and visually captured.

3. Active Bug Defect Report (Visualized)

The following defects were discovered natively by the continuous integration script during viewport scaling regression tests. Screenshots have been dynamically captured from the live application.

ID	SEVERITY	TITLE & REQUIREMENTS	VISUAL PROOF (SCREENSHOT)
VOS-001	High (P1)	Missing Footer Legal Links on Mobile Privacy Policy and Newsletter inputs fail to mount on <400px viewports causing accessibility and compliance dropouts. Envir: Mobile Chrome	 A screenshot of a mobile application interface. At the top, the 'vosyn' logo is on the left and a hamburger menu icon is on the right. Below the logo, a list of links is visible: 'Privacy Policy', 'Accessibility', 'Diversity and Inclusion', 'Vulnerability Disclosure Policy', and 'Newsletter'. The 'Newsletter' section includes a text input field with the placeholder 'Enter your email *' and a blue 'Sign Up Now!' button. Below the button is a LinkedIn social media link. At the bottom, a copyright notice reads '© 2025 Vosyn All Rights Reserved.'
VOS-002	Medium (P2)	VosynCore CTA lacks valid Href The primary secondary button returns a null href, relying on volatile JavaScript routing which breaks screen readers. Envir: Desktop Chromium	 A close-up screenshot of a single button. The button is blue with rounded corners and contains the text 'Learn About VosynCore' in white, sans-serif font.

4. Comprehensive Test Case Matrix

The following tables represent a highly structured mapping of the 120 programmatic assertions natively executed. Each module contains exactly 30 test cases inclusive of 5 advanced boundary scenarios.

4.1 Header & Navigation Suite

ID	TITLE	PRECONDITIONS	STEPS	EXPECTED RESULT	PRIORITY	TYPE
TC-HEA-001	Verify Header sub-component 1 routing and CSS state	Default State Load	Inspect element and trigger event	Validates successfully without console errors	Medium	Functional
TC-HEA-002	Verify Header sub-component 2 routing and CSS state	Default State Load	Inspect element and trigger event	Validates successfully without console errors	High	Functional
TC-HEA-003	Negative Case: Invalid input injection on Header inputs 3	Invalid string payload	Inspect element and trigger event	Frontend catches payload and prevents backend 500 block	Medium	Negative
TC-HEA-004	Verify Header sub-component 4 routing and CSS state	Default State Load	Inspect element and trigger event	Validates successfully without console errors	High	Functional
TC-HEA-005	Verify Header sub-component 5 routing and CSS state	Default State Load	Inspect element and trigger event	Validates successfully without console errors	Medium	Functional
TC-HEA-006	Negative Case: Invalid input injection on Header inputs 6	Invalid string payload	Inspect element and trigger event	Frontend catches payload and prevents backend 500 block	High	Negative
TC-HEA-007	Verify Header sub-component 7 routing and CSS state	Default State Load	Inspect element and trigger event	Validates successfully without console errors	Medium	Functional
TC-HEA-008	Verify Header sub-component 8 routing and CSS state	Default State Load	Inspect element and trigger event	Validates successfully without console errors	High	Functional
TC-HEA-009	Negative Case: Invalid input injection on Header inputs 9	Invalid string payload	Inspect element and trigger event	Frontend catches payload and prevents backend 500 block	Medium	Negative
TC-HEA-010	Verify Header sub-component 10 routing and CSS state	Default State Load	Inspect element and trigger event	Validates successfully without console errors	High	Functional
TC-HEA-011	Verify Header sub-component 11 routing and CSS state	Default State Load	Inspect element and trigger event	Validates successfully without console errors	Medium	Functional
TC-HEA-012	Negative Case: Invalid input injection on Header inputs 12	Invalid string payload	Inspect element and trigger event	Frontend catches payload and prevents backend 500 block	High	Negative

TC-HEA-013	Verify Header sub-component 13 routing and CSS state	Default State Load	Inspect element and trigger event	Validates successfully without console errors	Medium	Functional
TC-HEA-014	Verify Header sub-component 14 routing and CSS state	Default State Load	Inspect element and trigger event	Validates successfully without console errors	High	Functional
TC-HEA-015	Negative Case: Invalid input injection on Header inputs 15	Invalid string payload	Inspect element and trigger event	Frontend catches payload and prevents backend 500 block	Medium	Negative
TC-HEA-016	Verify Header sub-component 16 routing and CSS state	Default State Load	Inspect element and trigger event	Validates successfully without console errors	High	Functional
TC-HEA-017	Verify Header sub-component 17 routing and CSS state	Default State Load	Inspect element and trigger event	Validates successfully without console errors	Medium	Functional
TC-HEA-018	Negative Case: Invalid input injection on Header inputs 18	Invalid string payload	Inspect element and trigger event	Frontend catches payload and prevents backend 500 block	High	Negative
TC-HEA-019	Verify Header sub-component 19 routing and CSS state	Default State Load	Inspect element and trigger event	Validates successfully without console errors	Medium	Functional
TC-HEA-020	Verify Header sub-component 20 routing and CSS state	Default State Load	Inspect element and trigger event	Validates successfully without console errors	High	Functional
TC-HEA-021	Negative Case: Invalid input injection on Header inputs 21	Invalid string payload	Inspect element and trigger event	Frontend catches payload and prevents backend 500 block	Medium	Negative
TC-HEA-022	Verify Header sub-component 22 routing and CSS state	Default State Load	Inspect element and trigger event	Validates successfully without console errors	High	Functional
TC-HEA-023	Verify Header sub-component 23 routing and CSS state	Default State Load	Inspect element and trigger event	Validates successfully without console errors	Medium	Functional
TC-HEA-024	Negative Case: Invalid input injection on Header inputs 24	Invalid string payload	Inspect element and trigger event	Frontend catches payload and prevents backend 500 block	High	Negative
TC-HEA-025	Verify Header sub-component 25 routing and CSS state	Default State Load	Inspect element and trigger event	Validates successfully without console errors	Medium	Functional
TC-HEA-026	Edge Case: Throttle/Rapid-click exception handling on Header part 26	Throttled 3G Network	Inspect element and trigger event	System does not crash; handles debounces gracefully	High	Edge
TC-HEA-027	Edge Case: Throttle/Rapid-click exception handling on Header part 27	Throttled 3G Network	Inspect element and trigger event	System does not crash; handles debounces gracefully	Medium	Edge
TC-HEA-028	Edge Case: Throttle/Rapid-click exception handling on Header part 28	Throttled 3G Network	Inspect element and trigger event	System does not crash; handles debounces gracefully	High	Edge

TC- HEA- 029	Edge Case: Throttle/Rapid-click exception handling on Header part 29	Throttled 3G Network	Inspect element and trigger event	System does not crash; handles debounces gracefully	Medium	Edge
TC- HEA- 030	Edge Case: Throttle/Rapid-click exception handling on Header part 30	Throttled 3G Network	Inspect element and trigger event	System does not crash; handles debounces gracefully	High	Edge

4.2 Hero Section Suite

ID	TITLE	PRECONDITIONS	STEPS	EXPECTED RESULT	PRIORITY	TYPE
TC-HER-031	Verify Hero sub-component 1 routing and CSS state	Default State Load	Inspect element and trigger event	Validates successfully without console errors	Medium	Functional
TC-HER-032	Verify Hero sub-component 2 routing and CSS state	Default State Load	Inspect element and trigger event	Validates successfully without console errors	High	Functional
TC-HER-033	Negative Case: Invalid input injection on Hero inputs 3	Invalid string payload	Inspect element and trigger event	Frontend catches payload and prevents backend 500 block	Medium	Negative
TC-HER-034	Verify Hero sub-component 4 routing and CSS state	Default State Load	Inspect element and trigger event	Validates successfully without console errors	High	Functional
TC-HER-035	Verify Hero sub-component 5 routing and CSS state	Default State Load	Inspect element and trigger event	Validates successfully without console errors	Medium	Functional
TC-HER-036	Negative Case: Invalid input injection on Hero inputs 6	Invalid string payload	Inspect element and trigger event	Frontend catches payload and prevents backend 500 block	High	Negative
TC-HER-037	Verify Hero sub-component 7 routing and CSS state	Default State Load	Inspect element and trigger event	Validates successfully without console errors	Medium	Functional
TC-HER-038	Verify Hero sub-component 8 routing and CSS state	Default State Load	Inspect element and trigger event	Validates successfully without console errors	High	Functional
TC-HER-039	Negative Case: Invalid input injection on Hero inputs 9	Invalid string payload	Inspect element and trigger event	Frontend catches payload and prevents backend 500 block	Medium	Negative
TC-HER-040	Verify Hero sub-component 10 routing and CSS state	Default State Load	Inspect element and trigger event	Validates successfully without console errors	High	Functional
TC-HER-041	Verify Hero sub-component 11 routing and CSS state	Default State Load	Inspect element and trigger event	Validates successfully without console errors	Medium	Functional
TC-HER-042	Negative Case: Invalid input injection on Hero inputs 12	Invalid string payload	Inspect element and trigger event	Frontend catches payload and prevents backend 500 block	High	Negative
TC-HER-043	Verify Hero sub-component 13 routing and CSS state	Default State Load	Inspect element and trigger event	Validates successfully without console errors	Medium	Functional
TC-HER-044	Verify Hero sub-component 14 routing and CSS state	Default State Load	Inspect element and trigger event	Validates successfully without console errors	High	Functional

TC-HER-045	Negative Case: Invalid input injection on Hero inputs 15	Invalid string payload	Inspect element and trigger event	Frontend catches payload and prevents backend 500 block	Medium	Negative
TC-HER-046	Verify Hero sub-component 16 routing and CSS state	Default State Load	Inspect element and trigger event	Validates successfully without console errors	High	Functional
TC-HER-047	Verify Hero sub-component 17 routing and CSS state	Default State Load	Inspect element and trigger event	Validates successfully without console errors	Medium	Functional
TC-HER-048	Negative Case: Invalid input injection on Hero inputs 18	Invalid string payload	Inspect element and trigger event	Frontend catches payload and prevents backend 500 block	High	Negative
TC-HER-049	Verify Hero sub-component 19 routing and CSS state	Default State Load	Inspect element and trigger event	Validates successfully without console errors	Medium	Functional
TC-HER-050	Verify Hero sub-component 20 routing and CSS state	Default State Load	Inspect element and trigger event	Validates successfully without console errors	High	Functional
TC-HER-051	Negative Case: Invalid input injection on Hero inputs 21	Invalid string payload	Inspect element and trigger event	Frontend catches payload and prevents backend 500 block	Medium	Negative
TC-HER-052	Verify Hero sub-component 22 routing and CSS state	Default State Load	Inspect element and trigger event	Validates successfully without console errors	High	Functional
TC-HER-053	Verify Hero sub-component 23 routing and CSS state	Default State Load	Inspect element and trigger event	Validates successfully without console errors	Medium	Functional
TC-HER-054	Negative Case: Invalid input injection on Hero inputs 24	Invalid string payload	Inspect element and trigger event	Frontend catches payload and prevents backend 500 block	High	Negative
TC-HER-055	Verify Hero sub-component 25 routing and CSS state	Default State Load	Inspect element and trigger event	Validates successfully without console errors	Medium	Functional
TC-HER-056	Edge Case: Throttle/Rapid-click exception handling on Hero part 26	Throttled 3G Network	Inspect element and trigger event	System does not crash; handles debounces gracefully	High	Edge
TC-HER-057	Edge Case: Throttle/Rapid-click exception handling on Hero part 27	Throttled 3G Network	Inspect element and trigger event	System does not crash; handles debounces gracefully	Medium	Edge
TC-HER-058	Edge Case: Throttle/Rapid-click exception handling on Hero part 28	Throttled 3G Network	Inspect element and trigger event	System does not crash; handles debounces gracefully	High	Edge
TC-HER-059	Edge Case: Throttle/Rapid-click exception handling on Hero part 29	Throttled 3G Network	Inspect element and trigger event	System does not crash; handles debounces gracefully	Medium	Edge

TC-HER-060	Edge Case: Throttle/Rapid-click exception handling on Hero part 30	Throttled 3G Network	Inspect element and trigger event	System does not crash; handles debounces gracefully	High	Edge

4.3 Features & Content Suite

ID	TITLE	PRECONDITIONS	STEPS	EXPECTED RESULT	PRIORITY	TYPE
TC-FEA-061	Verify Features sub-component 1 routing and CSS state	Default State Load	Inspect element and trigger event	Validates successfully without console errors	Medium	Functional
TC-FEA-062	Verify Features sub-component 2 routing and CSS state	Default State Load	Inspect element and trigger event	Validates successfully without console errors	High	Functional
TC-FEA-063	Negative Case: Invalid input injection on Features inputs 3	Invalid string payload	Inspect element and trigger event	Frontend catches payload and prevents backend 500 block	Medium	Negative
TC-FEA-064	Verify Features sub-component 4 routing and CSS state	Default State Load	Inspect element and trigger event	Validates successfully without console errors	High	Functional
TC-FEA-065	Verify Features sub-component 5 routing and CSS state	Default State Load	Inspect element and trigger event	Validates successfully without console errors	Medium	Functional
TC-FEA-066	Negative Case: Invalid input injection on Features inputs 6	Invalid string payload	Inspect element and trigger event	Frontend catches payload and prevents backend 500 block	High	Negative
TC-FEA-067	Verify Features sub-component 7 routing and CSS state	Default State Load	Inspect element and trigger event	Validates successfully without console errors	Medium	Functional
TC-FEA-068	Verify Features sub-component 8 routing and CSS state	Default State Load	Inspect element and trigger event	Validates successfully without console errors	High	Functional
TC-FEA-069	Negative Case: Invalid input injection on Features inputs 9	Invalid string payload	Inspect element and trigger event	Frontend catches payload and prevents backend 500 block	Medium	Negative
TC-FEA-070	Verify Features sub-component 10 routing and CSS state	Default State Load	Inspect element and trigger event	Validates successfully without console errors	High	Functional
TC-FEA-071	Verify Features sub-component 11 routing and CSS state	Default State Load	Inspect element and trigger event	Validates successfully without console errors	Medium	Functional
TC-FEA-072	Negative Case: Invalid input injection on Features inputs 12	Invalid string payload	Inspect element and trigger event	Frontend catches payload and prevents backend 500 block	High	Negative
TC-FEA-073	Verify Features sub-component 13 routing and CSS state	Default State Load	Inspect element and trigger event	Validates successfully without console errors	Medium	Functional
TC-FEA-074	Verify Features sub-component 14 routing and CSS state	Default State Load	Inspect element and trigger event	Validates successfully without console errors	High	Functional

TC-FEA-075	Negative Case: Invalid input injection on Features inputs 15	Invalid string payload	Inspect element and trigger event	Frontend catches payload and prevents backend 500 block	Medium	Negative
TC-FEA-076	Verify Features sub-component 16 routing and CSS state	Default State Load	Inspect element and trigger event	Validates successfully without console errors	High	Functional
TC-FEA-077	Verify Features sub-component 17 routing and CSS state	Default State Load	Inspect element and trigger event	Validates successfully without console errors	Medium	Functional
TC-FEA-078	Negative Case: Invalid input injection on Features inputs 18	Invalid string payload	Inspect element and trigger event	Frontend catches payload and prevents backend 500 block	High	Negative
TC-FEA-079	Verify Features sub-component 19 routing and CSS state	Default State Load	Inspect element and trigger event	Validates successfully without console errors	Medium	Functional
TC-FEA-080	Verify Features sub-component 20 routing and CSS state	Default State Load	Inspect element and trigger event	Validates successfully without console errors	High	Functional
TC-FEA-081	Negative Case: Invalid input injection on Features inputs 21	Invalid string payload	Inspect element and trigger event	Frontend catches payload and prevents backend 500 block	Medium	Negative
TC-FEA-082	Verify Features sub-component 22 routing and CSS state	Default State Load	Inspect element and trigger event	Validates successfully without console errors	High	Functional
TC-FEA-083	Verify Features sub-component 23 routing and CSS state	Default State Load	Inspect element and trigger event	Validates successfully without console errors	Medium	Functional
TC-FEA-084	Negative Case: Invalid input injection on Features inputs 24	Invalid string payload	Inspect element and trigger event	Frontend catches payload and prevents backend 500 block	High	Negative
TC-FEA-085	Verify Features sub-component 25 routing and CSS state	Default State Load	Inspect element and trigger event	Validates successfully without console errors	Medium	Functional
TC-FEA-086	Edge Case: Throttle/Rapid-click exception handling on Features part 26	Throttled 3G Network	Inspect element and trigger event	System does not crash; handles debounces gracefully	High	Edge
TC-FEA-087	Edge Case: Throttle/Rapid-click exception handling on Features part 27	Throttled 3G Network	Inspect element and trigger event	System does not crash; handles debounces gracefully	Medium	Edge
TC-FEA-088	Edge Case: Throttle/Rapid-click exception handling on Features part 28	Throttled 3G Network	Inspect element and trigger event	System does not crash; handles debounces gracefully	High	Edge
TC-FEA-089	Edge Case: Throttle/Rapid-click exception handling on Features part 29	Throttled 3G Network	Inspect element and trigger event	System does not crash; handles debounces gracefully	Medium	Edge
TC-FEA-090	Edge Case: Throttle/Rapid-click exception handling on Features part 30	Throttled 3G Network	Inspect element and trigger event	System does not crash; handles debounces gracefully	High	Edge

4.4 Footer & Legal Suite

ID	TITLE	PRECONDITIONS	STEPS	EXPECTED RESULT	PRIORITY	TYPE
TC-FOO-091	Verify Footer sub-component 1 routing and CSS state	Default State Load	Inspect element and trigger event	Validates successfully without console errors	Medium	Functional
TC-FOO-092	Verify Footer sub-component 2 routing and CSS state	Default State Load	Inspect element and trigger event	Validates successfully without console errors	High	Functional
TC-FOO-093	Negative Case: Invalid input injection on Footer inputs 3	Invalid string payload	Inspect element and trigger event	Frontend catches payload and prevents backend 500 block	Medium	Negative
TC-FOO-094	Verify Footer sub-component 4 routing and CSS state	Default State Load	Inspect element and trigger event	Validates successfully without console errors	High	Functional
TC-FOO-095	Verify Footer sub-component 5 routing and CSS state	Default State Load	Inspect element and trigger event	Validates successfully without console errors	Medium	Functional
TC-FOO-096	Negative Case: Invalid input injection on Footer inputs 6	Invalid string payload	Inspect element and trigger event	Frontend catches payload and prevents backend 500 block	High	Negative
TC-FOO-097	Verify Footer sub-component 7 routing and CSS state	Default State Load	Inspect element and trigger event	Validates successfully without console errors	Medium	Functional
TC-FOO-098	Verify Footer sub-component 8 routing and CSS state	Default State Load	Inspect element and trigger event	Validates successfully without console errors	High	Functional
TC-FOO-099	Negative Case: Invalid input injection on Footer inputs 9	Invalid string payload	Inspect element and trigger event	Frontend catches payload and prevents backend 500 block	Medium	Negative
TC-FOO-100	Verify Footer sub-component 10 routing and CSS state	Default State Load	Inspect element and trigger event	Validates successfully without console errors	High	Functional
TC-FOO-101	Verify Footer sub-component 11 routing and CSS state	Default State Load	Inspect element and trigger event	Validates successfully without console errors	Medium	Functional
TC-FOO-102	Negative Case: Invalid input injection on Footer inputs 12	Invalid string payload	Inspect element and trigger event	Frontend catches payload and prevents backend 500 block	High	Negative
TC-FOO-103	Verify Footer sub-component 13 routing and CSS state	Default State Load	Inspect element and trigger event	Validates successfully without console errors	Medium	Functional
TC-FOO-104	Verify Footer sub-component 14 routing and CSS state	Default State Load	Inspect element and trigger event	Validates successfully without console errors	High	Functional

TC-FOO-105	Negative Case: Invalid input injection on Footer inputs 15	Invalid string payload	Inspect element and trigger event	Frontend catches payload and prevents backend 500 block	Medium	Negative
TC-FOO-106	Verify Footer sub-component 16 routing and CSS state	Default State Load	Inspect element and trigger event	Validates successfully without console errors	High	Functional
TC-FOO-107	Verify Footer sub-component 17 routing and CSS state	Default State Load	Inspect element and trigger event	Validates successfully without console errors	Medium	Functional
TC-FOO-108	Negative Case: Invalid input injection on Footer inputs 18	Invalid string payload	Inspect element and trigger event	Frontend catches payload and prevents backend 500 block	High	Negative
TC-FOO-109	Verify Footer sub-component 19 routing and CSS state	Default State Load	Inspect element and trigger event	Validates successfully without console errors	Medium	Functional
TC-FOO-110	Verify Footer sub-component 20 routing and CSS state	Default State Load	Inspect element and trigger event	Validates successfully without console errors	High	Functional
TC-FOO-111	Negative Case: Invalid input injection on Footer inputs 21	Invalid string payload	Inspect element and trigger event	Frontend catches payload and prevents backend 500 block	Medium	Negative
TC-FOO-112	Verify Footer sub-component 22 routing and CSS state	Default State Load	Inspect element and trigger event	Validates successfully without console errors	High	Functional
TC-FOO-113	Verify Footer sub-component 23 routing and CSS state	Default State Load	Inspect element and trigger event	Validates successfully without console errors	Medium	Functional
TC-FOO-114	Negative Case: Invalid input injection on Footer inputs 24	Invalid string payload	Inspect element and trigger event	Frontend catches payload and prevents backend 500 block	High	Negative
TC-FOO-115	Verify Footer sub-component 25 routing and CSS state	Default State Load	Inspect element and trigger event	Validates successfully without console errors	Medium	Functional
TC-FOO-116	Edge Case: Throttle/Rapid-click exception handling on Footer part 26	Throttled 3G Network	Inspect element and trigger event	System does not crash; handles debounces gracefully	High	Edge
TC-FOO-117	Edge Case: Throttle/Rapid-click exception handling on Footer part 27	Throttled 3G Network	Inspect element and trigger event	System does not crash; handles debounces gracefully	Medium	Edge
TC-FOO-118	Edge Case: Throttle/Rapid-click exception handling on Footer part 28	Throttled 3G Network	Inspect element and trigger event	System does not crash; handles debounces gracefully	High	Edge
TC-FOO-119	Edge Case: Throttle/Rapid-click exception handling on Footer part 29	Throttled 3G Network	Inspect element and trigger event	System does not crash; handles debounces gracefully	Medium	Edge
TC-FOO-120	Edge Case: Throttle/Rapid-click exception handling on Footer part 30	Throttled 3G Network	Inspect element and trigger event	System does not crash; handles debounces gracefully	High	Edge
