

Vosyn.ai - Comprehensive Test Cases Overview

ID Range	Functional Area	Coverage Description	Expected Condition
TC001 - TC025	Header & Nav	Verify logos, visible links, dropdowns on hover, sticky scroll triggers, glassmorphism CSS, and mobile burger menu states.	All links resolve properly. Navigation adapts to sticky at Y > 500px. Mobile hides links until toggled.
TC026 - TC050	Hero Section	Validate explicit H1 copy, Subheading copy, CTA routing to /waitlist, video/animated background loading, and mobile text scaling without overflow.	Text strictly matches localized English copy. CTA hover fires CSS change. Background unblocked for screen readers.
TC051 - TC075	Features	Verify "Why Vosyn?" sections, check 90%, \$46B, and 80% statistics render, and VosynCore spotlight CTA interaction.	Stats are fully rendered. 3-column layout collapses to 1-column on Pixel 5 viewport. Image alt tags present.
TC076 - TC100	Footer	Iterate all 4 column links (Company, Products, Resources, Newsletter). Mail input handles @. LinkedIn utilizes target="_blank". Go To Top resets Y coordinate.	Newsletter accepts standard RFC 5322 email string. Copyright dynamic year matches 2025. Mobile footer stacks vertically.

Note: The fully expanded definition containing all 100 programmatic steps is stored within the associated Playwright TypeScript test repository.
