

Comprehensive Test Cases - Vosyn Website

Date: 2026-03-23

Positive Flow & Navigation Scenarios

1. **TC01:** Verify homepage loads completely within acceptable limits. (Status: Pass)
2. **TC02:** Verify navigation to `/vosynverse/` displays relevant content without broken layouts. (Status: Pass)
3. **TC03:** Verify navigation to `/vosyncore/` renders specific core product descriptions. (Status: Pass)
4. **TC04:** Verify `/vosynconnect/` correctly displays expected hero headers. (Status: Pass)
5. **TC05:** Verify all main navigation menu links operate and direct to the correct URL. (Status: Pass)
6. **TC06:** Verify standard hyperlinks embedded in footer are functional. (Status: Pass)
7. **TC07:** Verify page titles successfully reflect the current page context. (Status: Pass)

Usability & Content Checking Scenarios

8. **TC08:** Verify imagery strictly renders across all viewport sizes without severe clipping. (Status: Pass)
9. **TC09:** Verify the brand logo redirects to the homepage `/`. (Status: Pass)
10. **TC10:** Verify text content on `/about-us/` has appropriate contrast against its background. (Status: Pass)
11. **TC11:** Verify team/investor layout on `/investors/` aligns symmetrically on a 1280x800 display. (Status: Pass)
12. **TC12:** Verify `/media-pr/` displays articles/links cleanly formatted. (Status: Pass)
13. **TC13:** Verify the `/careers/` page accurately lists responsibilities for open roles. (Status: Pass)
14. **TC14:** Verify standard buttons (e.g., "Learn More") effectively trigger their hover states. (Status: Pass)
15. **TC15:** Verify responsive grid structures adapt nicely without content overlap. (Status: Pass)

Validation & Forms (Negative / Error Validation)

16. **TC16:** Verify `/contact-us/` form displays error prompts when submitting blank mandatory fields. (Status: Pass)
17. **TC17:** Verify invalid email formats trigger warning messages (e.g., "test@.com") gracefully. (Status: Pass)
18. **TC18:** Verify the waitlist form `/join-the-waitlist/#form` restricts excessively long username inputs (character limits). (Status: Pass)
19. **TC19:** Verify submitting forms with SQL injection characters (`' OR 1=1;`) sanitizes and does not break the DB. (Status: Pass)
20. **TC20:** Verify users cannot bypass required CAPTCHA or anti-bot measures during submission. (Status: Pass)
21. **TC21:** Verify form success message renders visibly after valid submission. (Status: Pass)

Edge Cases

22. **TC22 (Edge):** Verify rapid successive clicking on the waitlist "Submit" button does not fire duplicate requests or hang the UI. (Status: Pass)
23. **TC23 (Edge):** Verify form behavior when simulating extremely high latency or a random network drop mid-submission. (Status: Pass)

- 24. **TC24 (Edge):** Verify extremely skewed aspect ratios (e.g., 500x1200 vertical desktop window) do not orphan primary CSS elements. (Status: Pass)
- 25. **TC25 (Edge):** Verify injection of multi-byte emoji characters within form fields encodes properly without UI corruption. (Status: Pass)
- 26. **TC26 (Edge):** Verify browser cookie blocking does not entirely crash the frontend experience. (Status: Pass)

Final Usability Checks

- 27. **TC27:** Verify 404 handling redirects or provides a graceful fallback for fake URLs (e.g., `/does-not-exist`). (Status: Pass)
- 28. **TC28:** Verify scroll animations trigger elements efficiently without thrashing the DOM. (Status: Pass)
