

QA Execution Test Plan - Vosyn Website

Date: 2026-03-23

Prepared For: Aquarius Test Automation

1. Executive Summary

This Test Plan outlines the strategy, scope, environment, and methodologies used for evaluating the core Vosyn.ai web platform. The goal is to ensure functionality, performance, and UI consistency across 11 key pages.

2. Scope of Testing

The testing encompasses the following pages:

- <https://vosyn.ai/>
- <https://vosyn.ai/vosynverse/>
- <https://vosyn.ai/vosyncore/>
- <https://vosyn.ai/vosynconnect/>
- <https://vosyn.ai/about-us/>
- <https://vosyn.ai/investors/>
- <https://vosyn.ai/media-pr/>
- <https://vosyn.ai/careers/>
- <https://vosyn.ai/contact-us/>
- <https://vosyn.ai/join-the-waitlist/>
- <https://vosyn.ai/join-the-waitlist/#form>

In-Scope: Functional, UI/UX, Navigation, Content Visibility, Performance (Load behavior), Broken Elements/Links.

Out-of-Scope: Deep security penetration testing, backend API unit testing, and third-party integrations outside the immediate DOM.

3. Test Environments

- **Browser:** Chromium (Headless Automation via Playwright)
- **Viewport:** 1280x800 Desktop
- **Network:** Standard Broadband (Simulated through WebDriver)

4. Test Deliverables

1. Test Plan
2. Test Cases (Comprehensive suite)
3. Bug Report (With severities and screenshots)
4. Performance Testing Report
5. General QA Comprehensive Report
